

TopBrewer

The original smart coffee solution

scanomat
coffee solutions for more than 50 years

This is why the TopBrewer is the **SMART COFFEE SOLUTION**

Single touch brewing

Smart monitoring with Coffee Cloud

Danish design and handbuilt quality

Environmentally friendly

Extremely quiet

Fit uniquely into any space

A coffee experience you will never forget

Designed to meet the needs of today's coffee enthusiast, the TopBrewer will seamlessly integrate into any environment to deliver a variety of drinks with an incredible taste & quality, at the touch of the TopBrewer app.

Scanomat has reimaged the traditional bean-to-cup coffee machine with its innovative under-counter design, stylish swan-neck tap and an app-control technology.

At the start of each day, simply refill the coffee beans and fresh milk and the TopBrewer is ready to go in just 45 seconds from standby.

Quality coffee

Coffee smart

Single touch brewing

One-Click function for fast and easy operations with a clean surfaced animation - interacting with our app and brewing a cup of coffee, is all part of your coffee experience.

As a user of the TopBrewer, you will always be presented with the current state. No matter what happens in the process, the TopBrewer will inform you of it's current activity.

This is what we think is part of delivering a great user experience!

OFFICE CLUB - shared office space

Built for architecture

Quality is our mantra in coffee making. But we want you to be prepared the best way possible. With our pre-installation guides you can prepare any space easily for the TopBrewer Compact and Pro. These guides include cutout, electrical, plumbing and ventilation requirements.

The TopBrewer will fit uniquely into any space. It can easily stand alone or be integrated into existing furniture or even be a part of an environment. With a minimum space usage we pride ourselves in making a coffee unit, that unobtrusively fits into any beautifully designed environment.

Excellent quality with ease

The TopBrewer instantly brews a delicious espresso or coffee without sacrificing quality. Thanks to the advanced precious metal grinder and the brewing mechanism, the time-out between brewing operations is second to none.

The TopBrewer fulfills every requirement for a robust, high-quality product. The temperatures are monitored electronically (CoffeeCloud), which means that no temperature drop can occur at any time.

The cleaning of the TopBrewers is easy to handle, runs very fast and mostly automatically. The fresh milk lines are rinsed residue-free after each preparation, whereby the use of chemicals can be minimized.

Unique technology in timelessly elegant design

95% of the TopBrewers consist of the substructure and are therefore not visible. This gives you a minimal and space saving installation with almost no noise.

Its sleek swan-neck is adjustable in height and rotation, allowing it to be modularly adapted to any design with our range of finishes.

TopBrewer comes in a Compact and Pro model.

Premium coffee roasted by AMOKKA

Our coffee range is roasted to perfection by AMOKKA Coffee Roasters to ensure the best quality when brewed by the TopBrewer.

Sustainable sourcing and trading is a key to our partnership with coffee farmers around the world. AMOKKA goes the extra mile to get the best speciality coffee while ensuring that the smallholder farmer and the local community, can improve their production methods and their quality of life.

We support coffee projects in Brazil, Nicaragua, Nepal and Ethiopia with our Impact Trade movement.

Sustainable Core Values INVESTING IN OUR FUTURE

For us, two aspects of sustainability are at the top of our agenda: **sustainable growth** and **sustainable trade**. Sustainable growth means ensuring that the environment does not suffer unnecessary harm as a result of coffee farming, i.e. avoiding the use of harmful artificial pesticides.

Sustainable trade is when the commercial exchange of products generates economic and environmental benefits, including: the creation of economic value, reducing poverty & inequality, and preserving environmental resources.

We make every effort at AMOKKA Coffee Roasters to buy our coffee from farms where we have a direct trading relationship with the plantation and we have the knowledge that the coffee is grown as sustainably as possible for the local environment.

Finca Jesper - Nicaragua

We make a difference

There are a lot of school children in Ethiopia who do not have direct access to clean, fresh water. They have to carry water with them to school from far away, and usually they bring it in a big, yellow, plastic can.

AMOKKA changed that by constructing the tap water station for the local elementary school for the children from first to fourth grade.

This water tap station was constructed in front of the school and will provide clean water to 1000 school children. This will have a great impact on their everyday life. They will forever say goodbye to the big, clumsy, yellow, plastic, jerry cans.

AMOKKA provided the means for the essential ingredients of this project, that is: water pipes, tap, concrete, gravel, framework, machines and constructors.

In order for the project to be a great success, we inspired the community to get involved. Everyone from school children to teachers, parents, and kebele (village authority) contributed and took ownership of the tap water station project.

TopWater

Fresh, filtered still and sparkling water

TopWater is a premium filtered water tap that can provide an endless supply of still and sparkling filtered water from one stylish unit, saving the cost of bottled water and reducing carbon footprint.

TopWater is a commercially viable alternative to bottled water; the TopWater not only saves money, but also eliminates the environmental impact of plastic bottles.

TopWater provides a hygienic and simple way to serve fresh filtered water; ideal for hotels, coffee shops and the workplace as an alternative to jugs or bottled water.

The stylish, minimal design keeps the counter clutter and mess free. The swan neck is height adjustable and swivels.

TopJuicer

A completely new way to serve juice

Revolutionize the way you serve fresh juice to guests and customers with the stylish TopJuicer juice machine. The minimal TopJuicer delivers fresh juice from a stylish tap at the touch of the TopBrewer app, whilst the main unit is hidden neatly under the counter.

The TopJuicer is ideal for breakfast service and conference refreshment areas as an alternative to jugs or tabletop machines. It has a stylish minimal design and provides a variety of cold drinks from one unitd.

The swan neck is height adjustable and swivels. The TopJuicer has a minimal footprint and stylish appearance which is ideal for hotels, spas, universities, coffee shops and the workplace, providing a healthy beverage option.

From a single garage to a LEADING COFFEE COMPANY

Back in 1981, CEO of Scanomat Kim Vibe-Petersen designed the world's first fully automatic cappuccino machine.

Since then, Scanomat has been known for its innovative, high quality solutions. Today, its flagship product - the TopBrewer - is changing the coffee experience and is taking us upon a journey around the world.

Scanomat has reimaged the traditional bean-to-cup coffee machine with its innovative under-counter design, stylish swan-neck tap and app-control technology. Designed to meet the needs of today's coffee enthusiast, the TopBrewer integrates seamlessly into any environment to deliver a full range of premium drinks, with an incredible taste and quality, at the touch of the TopBrewer app.
